## Quality Policy

Product quality and satisfied customers are the most important success factors for profitable business in Aurubis Finland Oy.

By continuous improvement of processes we guarantee to keep the quality of products and operation at the level of our customers' requirements also in the future.

The personnel's expertise and cooperation ensure the preservation and development of process performance according to targets.

## Quality Target

The quality target of Aurubis Finland Oy is to be the best manufacturer of rolled products in the world. This goal we reach with concrete measures, which include among other things continuous measurement, analysis of results, ability to react fast and continuous improvement.

The organization's performance is followed up in internal meetings through key operative performance indicators. External audits carried out by e.g. customers help us reach our goal. The effectiveness of corrective measures is estimated in annual management reviews and, if necessary, the management defines new actions to achieve even better results.
